APPENDIX E

LP250 UPGRADE AVAILABILITY REPORT

This report shows the upgrade status for all existing LPFM stations. Upgrade status falls into one of four categories:

- LPFM stations that already meet the proposed LP250 minimum distance separation requirements for their current channel and authorized geographic coordinates. Stations that are or will be second-adjacent channel short-spaced as a result of the upgrade are shown. Where possible, the service contour field strength of the weakest second-adjacent channel short-spaced station is shown. The stronger the field strength, the more likely that the LP100 station would be able to upgrade without antenna modifications.
- LPFM stations that do not meet the proposed LP250 minimum distance separation requirements for their current channel and authorized geographic coordinates but, from the same geographic coordinates, could meet the LP250 minimum distance separation requirements on a channel that is 1, 2, 3, 53 or 54 channels removed and therefore can be accomplished as a minor change pursuant to §73.870(a) of the Commission’s Rules.
- LPFM stations that do not meet the proposed LP250 minimum distance separation requirements for their current channel and authorized geographic coordinates but, from the same geographic coordinates, could meet the LP250 minimum distance separations on a channel other than one that is 1, 2, 3, 53 or 54 channels removed. Pursuant to §73.870(a), a minor change to one of these channels would also require a showing that there would be a reduction in interference either to or from the LPFM station. Otherwise, the channel change would be considered major and absent a specific Commission order, would be considered a major change.
- LPFM stations that do not meet the proposed LP250 minimum distance separation requirements for their current channel and authorized geographic coordinates and from those coordinates would not be able to change to any of the other 99 channels in order to obtain the upgrade.

Facilities with the comment “2ADJ FX SHORT SPACE ONLY” means that the station meets all distance separation requirements on co-channel and first-adjacent channel to all full-service, LPFM and FM translator facilities. In addition, the facility also meets all distance separation requirements on second-adjacent channels to full-service FM facilities but not to FM translators. In a separate proceeding, REC will be proposing to eliminate all requirements that LPFM stations be required to protect FM translators on second-adjacent channels. If that rule is ever adopted, this facility may be able to upgrade.

Facilities with the comment “ONLY SHORT SPACED TO ANOTHER LPFM STA.” means that the station meets all distance separation requirements to full-service and FM translators, however, it does not meet the minimum distance separation to other LPFM stations. For the purpose of this report, co-channel LPFMs are protected out to 31 kilometers co-channel and 17 kilometers first-adjacent channel, which is the proposed LP250 to LP250 protection requirements. REC proposes to require a full LP250 to LP250 protection during an initial “launch window” for existing LPFM stations to request the upgrade to LP250. The full distances during the launch window would assure that all applicants get an equal

FACID	CALL	COMMUNITY	LICENSEE	POP-100	POP-250	METRO DIST.	COMMENTS

<p>opportunity to upgrade without any concerns about mutually exclusive applications. After the launch window, the minimum distance separations from a LP250 to an LP100 station will be 29 kilometers for co-channel and 16 kilometers for first-adjacent. Therefore, if the rounded distance is 29 or 30 km for co-channel or 16 km for first-adjacent, the LP100 station will be able to upgrade after the launch window if the other LPFM station does not or cannot upgrade.</p>							

The hash symbol (#) between the Facility ID number and the station call-sign indicates that the facility falls within the “exclusion zone” proposed in the *Fourth Notice of Proposed Rulemaking* in MM Docket 99-25 (27 FCC Rcd. 3315 (2012) at ¶ 51). In that proceeding, the FCC proposed to prohibit LP250 stations within a specific radius of the designated city center of the top 100 media markets. The exclusion zone was within 30 km for markets 1-20, 20 km for markets 21-50 and 10 km for markets 51-100. REC adamantly opposes the use of an “exclusion zone”. The numbers will show that spectrum crowding will prevent a considerable majority of LP100 stations, especially in the top 50 markets from being able to upgrade. Distances to the city center for the top-100 markets is shown in the “Metro” column.

Estimated populations for 60 dBu F(50,50) coverage as both an LP100 and a LP250 are included.

Page 90 is a summary of totals and percentages. These values are approximate, and the margin of error is a small number of hand corrections that were made to the data output.

Starting at Page 91, we provide a list of stations that could be candidates if the Commission was to optionally consider “automatic upgrade authority” as a method to “fast track” upgrades and reduce overall staff burden. These stations meet the following requirements: (1) the LPFM station is fully licensed, (2) stations must meet all distance separation requirements including second-adjacent, (3) “foothill effect” stations with a peak 60 dBu F(50,50) lobe that exceeds 12.7 kilometers, (4) stations must be located at least 320 kilometers from an international border and (5) station must currently operate on channels 221 through 300.

**** LPFM STATIONS THAT ARE SHORT SPACED TO OTHER LPFM STATIONS BUT MAY BE ABLE TO UPGRADE AFTER LAUNCH WINDOW ****							
196070	KHUG-LP	CASTAIC	CA SLOAN CANYON COMMUNICATIONS	25529	32701	66.0	ONLY SHORT-SPACED TO ANOTHER LPFM STA. KHUG-LP is short-spaced to KLQS-LP, Agua Dulce, CA with 30 km separation. If KLQS-LP does not upgrade, then KHUG-LP can upgrade with second adjacent channel waivers for KAMP-FM (67.6 dBu) and KLAX-FM (50.6 dBu). KLQS-LP is unable to upgrade at their current location due to co-channel short-spacing with KLYY, Riverside, CA (111.5km, requires 121 km) and first-adjacent station KTPI-FM, Mojave CA (55.5 km, requires 58 km).
195574	KBUU-LP	MALIBU	CA ZUMA BEACH FM EMERGENCY AND COMMUNITY BR	8104	9305	60.8	ONLY SHORT-SPACED TO ANOTHER LPFM STA.
197314	KWSV-LP	SIMI VALLEY	CA STRATEGIC INTERNATIONAL MINISTRIES	89310	168526	---	ONLY SHORT-SPACED TO ANOTHER LPFM STA.
195799#	KTPC-LP	VENICE	CA REACH FOR THE TOP, INC.	295689	402028	25.4	ONLY SHORT-SPACED TO ANOTHER LPFM STA. KBUU-LP is short spaced to KWSV-LP, Simi Valley, CA (29.5 km, requires 31 km) and KTPC-LP, Venice, CA (30.2 km, requires 31 km). KWSV-LP meets all distance separations to other co- and first-adjacent stations with second-adjacent short spacing to KYSR Los Angeles, CA (80.6 dBu) and KKLA-FM, Los Angeles (67.9 dBu). KTPC-LP is in a time share with KFEP-LP, KLDB-LP and KZUT-LP. KTPC-LP has a second-adjacent channel short-space with KYSR, Los Angeles CA (95.7 dBu) and KKLA-FM, Los Angeles CA (77.2 dBu). KTPC-LP does meet minimum LP250-LP250 distance to KWSV-LP. Two post launch window upgrade scenarios are possible. (1) KBUU-LP can upgrade and KWSV-LP and KTPC-LP would remain at LP100 or (2) KWSV-LP and KTPC-LP can upgrade and would block KBUU-LP from upgrading.
197628	WESI-LP	SUGARHILL	GA IGLESIA DE CRISTO ELIM GEORGIA, INC.	55283	81582	65.0	ONLY SHORT-SPACED TO ANOTHER LPFM STA.
195233	WFDG-LP	MURRAYVILLE	GA BIG BAND FANS	11283	15182	---	WESI-LP is short-spaced to WFDG-LP, Murrayville GA (29.1 km, requires 31 km). WFDG-LP meets all distance separation requirements except to WESI-LP. In this case, only WESI-LP or WFDG-LP would be able to upgrade from their current locations after the launch window. NOTE: WFDG-LP does have the option of making a minor change from channel 222 to channel 223 and then both stations would be able to upgrade.
192736	WSJF-LP	ELDERSBURG	MD ST. JOSEPH'S, SYKESVILLE, ROMAN CATHOLIC	24263	33328	42.4	ONLY SHORT-SPACED TO ANOTHER LPFM STA. WVTO-LP, Baltimore MD is short-spaced to WSJF-LP (29.4 km, requires 31 km). WSJF-LP is second-adjacent channel short-spaced to WERQ-FM, Baltimore MD (70.3 dBu) and WPOC, Baltimore MD (76.6 dBu). At LP250, WVTO-LP would be short-spaced to WDCJ, Prince Frederick MD (LIC - 66.8 km, requires 72 km, CP - 69.7 km, requires 72 km). Therefore, WVTO-LP would not be able to upgrade on channel and no alternate channels are available. WSJF-LP would be able to upgrade after the launch window.
193811	WHAV-LP	HAVERHILL	MA PUBLIC MEDIA OF NEW ENGLAND, INC.	53981	96785	46.1	ONLY SHORT-SPACED TO ANOTHER LPFM STA. WGUA-LP, Lawrence MA is first-adjacent channel short-spaced to WHAV-LP (16.3 km, requires 17 km). WGUA-LP is co-channel short spaced to W251CR, Medford MD (26.9 km, requires 37 km) and WCTK, New Bedford MA (117.2 km, requires 121 km). WGUA-LP has no alternate channels available. WHAV-LP would be able to upgrade after the launch window.
195268#	KENL-LP	ST. PAUL	MN ENLANCE ADVENTISTA	150637	259555	26.7	ONLY SHORT-SPACED TO ANOTHER LPFM STA. KENL-LP is first-adjacent channel short-spaced to KQEP-LP, Saint Paul MN (15.5 km, requires 17 km). KQEP-LP is also co-channel short-spaced to K250BY (17.6 km, requires 31km) and to KEFE-LP, Lakeville MN (27.9 km, requires 31 km). Because of K250BY, KQEP-LP not be able to upgrade. KENL-LP would be able to upgrade after the launch window. (15.5 km rounds to 16 km).

FACID	CALL	COMMUNITY	LICENSEE	POP-100	POP-250	METRO DIST.	COMMENTS

**** LPFM STATIONS THAT ARE SHORT SPACED TO OTHER LPFM STATIONS BUT MAY BE ABLE TO UPGRADE AFTER LAUNCH WINDOW ****							
134266	KQRZ-LP	HILLSBORO	OR OREGON AMATEUR RADIO CLUB	42297	64837	22.6	ONLY SHORT-SPACED TO ANOTHER LPFM STA. The precise distance between KQRZ-LP and KBSF-LP, Portland OR is measured at 30.459 km, which would round to 30 km. KBSF-LP is precisely measured at 19.472 km (rounded to 19 km) to intermediate frequency station KQAC, Portland OR. A minimum of 20 km is required to meet the minimum IF distance to a class C1 station. KBSF-LP has a HAAT of 30m or less, therefore, they are operating at a full 100W ERP. As a result, KBSF-LP would not be able to upgrade from their current location. KQRZ-LP would be able to upgrade to LP250 after the launch window taking into consideration second-adjacent channel short-spaced stations KKRZ, Portland OR (99.8 dBu) and KXL-FM, Portland OR (99.7 dBu).
194855	WXRU-LP	PIEDMONT	SC LOST SOULS YOUTH DEVELOPMENT CORPORATION	21473	33081	16.3	ONLY SHORT-SPACED TO ANOTHER LPFM STA. WGKY-LP is first-adjacent channel short-spaced to WXRU-LP (16.2 km, requires 17 km). WGKY-LP is co-channel short-spaced with W229B0, Berea SC (22.0 km, requires 37km) thus preventing WGKY from being able to upgrade. WXRU-LP would be able to upgrade to LP250 after the launch window.
194439	WPYR-LP	BATON ROUGE	LA THE SISTER DULCE FOUNDATION, INC.	117642	147522	17.8	ONLY SHORT-SPACED TO ANOTHER LPFM STA. A precise measurement shows distance separation between WPYR-LP and WTQT-LP at 15.462 km. Neither station would be able to upgrade from their current site. A move of at least 38 meters more separate would allow either WPYR-LP or WTQT-LP (but not both) to be able to upgrade after the launch window. WTQT-LP could make a non-adjacent channel change which would eliminate the short-spacing and permit WPYR-LP to upgrade. WPYR-LP has a second-adjacent channel short-spacing with KDDK, Addis LA (59.3 dBu).
196505	KMRW-LP	SPRINGDALE	AR COMMUNITY EDUCATIONAL RADIO	30832	46418	---	ONLY SHORT-SPACED TO ANOTHER LPFM STA. A precise measurement shows distance separation between KMRW-LP and KDIV-LP, Fayetteville AR at 15.521 km (which rounds to 16 km). Both KDIV-LP and KMRW-LP meet distance separation to all co/first adjacent and IF facilities. KDIV-LP is second adjacent channel short-spaced to KKEG, Bentonville AR (84.5 dBu). On their currently authorized channels, only one of KMRW-LP or KDIV-LP would be able to upgrade. KMRW-LP has no alternative channels available. KDIV-LP can make a non-adjacent channel change to upgrade with a new second adjacent channel waiver request. Either KDIV-LP or KMRW-LP would be able to upgrade but not both. KDIV-LP is able to make a non-adjacent channel change in order to get LP250. If KDIV-LP changes channel, both KMRW-LP and KDIV-LP would be able to upgrade.
124387	WCFY-LP	EVANSVILLE	IN CHRISTIAN FELLOWSHIP CHURCH INC	79070	95445	---	ONLY SHORT-SPACED TO ANOTHER LPFM STA. A precise measurement shows distance separation between WCFY-LP and WDXM-LP, Newburgh IN at 15.532 km (which rounds to 16 km). WDXM-LP is currently less than 30 meters HAAT and therefore is subject to a full 100 watts ERP at LP100. WDXM-LP does not meet the intermediate frequency separation requirements with WNIN-FM, Evansville IN (9.8 km, requires 12km). Therefore, WDXM-LP would not be able to upgrade on channel. WDXM-LP could move to another channel. WCFY-LP would be able to upgrade on channel following the launch window with a second-adjacent channel short-spacing with WKDQ, Henderson KY (88.9 dBu).
192697	WRPG-LP	PIKEVILLE	NC PLEASANT GROVE ORIGINAL FREE WILL BAPTIS	16936	22829	---	ONLY SHORT-SPACED TO ANOTHER LPFM STA. WUBN-LP, Wilson NC 30 km from WRPG-LP. Other than WRPG-LP, WUBN-LP meets all distance separation requirements including second adjacent. WRPG-LP has no alternative channels available however WUBN-LP has non-adjacent channel availability. On their current channel and site, either WRPG-LP or WUBN-LP would be able to upgrade after the launch window.
